Sir:

**RESPONSE/REQUEST TO  
WITHDRAW "FINAL" ACTION**

In response to the "final" office action dated 01/07/2005, reconsideration of this application is respectfully requested in light of the following remarks.

In response to the just prior "final" office action dated 04/29/2004, applicants filed an RCE together with an amendment of October 29, 2004 which, inter alia, requires a customized intelligent peripheral unit enabled to play out information through a standardized interface in different formats depending upon a given user. The Examiner apparently does not consider such amendments to have made any significant change in the claimed subject matter because the very first action now received after the RCE is also designated a "final" office action.
